

SEI 5.56mm M4DC Sound Suppressor

Quick detaching and rebuildable suppressor
for the M-16 family of weapons and other 5.56mm assault weapons
with appropriate Vortex® DC interface.

The Smith Enterprise, Inc. M4DC ("Direct Connect") sound suppressor, designed to interface perfectly with the world's best flash hider – the patented Vortex® design, is an extremely robust and efficient unit intended specifically for official end-users. With the suppressor being rebuildable in the field, this fact should not be lost upon combat leaders and logisticians as a most fiscally responsible system. The fact that the suppressor is rebuildable in the field at the operator level and without special tools should be an equally important consideration.

The key features of the M4DC to consider are as follows:

- Rebuildable in the field without the need for special tools.
- Titanium locking collar.
- Compatible for use with Winchester™ Ranger 45 grain frangible ammunition.
- Suitable for all 5.56mm NATO weapons with appropriate Vortex® DC unit.
- Secure dual locking plates.
- Materials and finishes selected for maximum corrosion resistance.
- Special hard chroming of internal components for long life.

Also available from SEI is the M4DC Rebuild Kit, which is composed of four replacement baffles, two spare locking tabs and an extra front end cap.

General Specifications

- Overall length, inches: 9.2
- Diameter, in.: 1.5
- Weight, ounces: 26
- Suppressor Interface:
SEI Vortex® G6A2 Flash Suppressor (P/N 1003V)
- Materials:
 - Outer body and internals – 300 series
Stainless Steel
 - Coupling Device – Titanium
 - Locking Plates – 17-4 Stainless Tool Steel
- Finishes – Tiodize on coupling device. The end cap and the locking collar are salt bath nitrite to 60 Hrc. Extremely hard thin dense chrome is on internal components and they are treated after to prevent cracking of the chrome.

Note: Since SEI suppressors are rebuildable designs, all internal components are installed with XF-7 grease (will not burn off even when torch flame is directed straight on it), so as to facilitate easy removal during rebuild or maintenance as required. Always ensure to use our XF-7 grease when reinstalling internal components. XF-7 aka Crazy Horse grease is non toxic as well.

The Smith Enterprise Inc. M4DC Sound Suppressor is only available to the US Government, law enforcement and through Foreign Military Sales.

The mark "Vortex"® is a federally registered trademark owned by Smith Enterprise, Inc.
