VORTEX® 9MM SMG FLASH ELIMINATOR (SOUND SUPPRESSOR CAPABLE), P/N 1007V

The world's best flash suppressor now available for use with SEI M9DC Sound Suppressor on Rock River™ and Colt™ 9mm submachineguns.

(Fig.1) SEI 9MM SMG Vortex Flash Suppressor

Based on the combat-proven Vortex® 5.56mm G6A2 system, the 9mm NATO sound suppressor-capable Vortex is now available for the Rock River™ and Colt™ submachineguns, threaded 1/2 X 36 TPI. The new 9MM SMG model features our patented 15-degree helix, guaranteeing a complete propellant burn and negligible flash, unlike the standard issue closed-end “bird cage” unit or competing straight-flute designs. Right hand helical flutes will not loosen under sustained fire. The flute configuration is 40% stronger due to greater mass. The aligning of exiting gases helps to improve overall accuracy.

The 9mm SMG Vortex also serves as a quick-connecting interface for our forthcoming M9DC Sound and Flash Suppressor. SEI suppressors are only available to USG/LE and FMS customers via direct factory sales.

SPECS: 9mm SMG Vortex: 8620 steel, RC 35-38, black parkerized per MIL SPEC. 1/2 X 36 TPI, 2-1/4” long, .860” diameter, 2.8 oz. weight.

*NOTE: SEI sound suppressors are only available to USG and FMS customers and through direct factory sales.

P/N 1007V Vortex® 9mm SMG Flash Eliminator (Sound Suppressor Capable)
