VORTEX® 7.62MM NATO FAL (METRIC) FLASH ELIMINATOR, P/N 6025V

New enhanced design now supports use of SEI quick-disconnecting 0.30 cal. sound suppressor.

SEI Vortex® suppressor-capable flash eliminator for FAL (Metric) rifle.

The world’s most effective flash eliminator is now finally available for the 7.62mm NATO FAL (metric) rifle. Based on the combat-proven Vortex® system, the definitive development of the patented Vortex® design now features a 40% increase in structural rigidity. This new version also enables the use of our quick disconnecting 0.30 caliber DC (“Direct Connect”) sound suppressor*. The FAL Vortex features our patented 15-degree helix, guaranteeing a complete propellant burn and negligible flash, unlike the standard issue closed-end “bird cage” unit or competing straight-flute designs. Left hand helical flutes will not loosen under sustained fire. The aligning of exiting gases with this patented design has been proven to enhance practical accuracy.

A very small number of FAL Vortex flash eliminators are available for retail consumers.

SPECS: FAL (Metric) Vortex®: Heat-treated 8620 steel, RC 55-60 Internal, RC 35-38 Surface Hardness to depth .006 to .010, 9/16” X 24 TPI (Left), Phosphate Finish, Overall Length 2.600”, Diameter .860”, Wt. .24 lb.

*Note: SEI Sound suppressors are only available to USG and FMS customers and through direct factory sales.
